

# DELIVERING EFFECTIVE SOLUTIONS FOR REOPENING YOUR BUSINESS

## LeChase provides workplace modifications to help clients safely welcome back their employees

CASE STUDY

A pharmaceutical company located in the northeastern US was looking for measures to safeguard its office employees, who sit in clusters of work cubicles with only short dividers between. Within two weeks, LeChase installed plexiglass panels on both interior and exterior cubicle walls throughout two floors of office space. The plexiglass, which extends about 17 inches above the existing walls, helps shield workers from passers-by as well as those in adjacent offices, while not obstructing light or visibility.
